BioHib / Biocure 3000 Technical Data Sheet V10/2026C

BioHib / Biocure 3000 is a totally new concept emulsion enhancement additive offering multifunctional benefits to in-use emulsions. The product offers improvements not only to increase pH and reserve alkalinity of in-use emulsions but also offers improvements to inherent ferrous corrosion protection especially in high humidity and hardwater environments.

Features& Benefits

- ✓Broad spectrum biocidal activity
- ✓Improved emulsion biostability
- ✓Increased levels of ferrous and non-ferrous corrosion inhibition
- ✓Fungicidal properties
- ✓Increased emulsion sump life
- ✓Secondary amine-free
- ✓NP Ethoxylates free
- ✓Multifunctional
- ✓Low foaming tendency
- ✓Multi-metal compatible

Application

In-use emulsions; 0.2% by volume and up to 2% by volume for emulsions in a poor condition. (This information is given as a guide but without guarantee)

Technical characteristics

Appearance @ 20˚c	Amber Liquid
Specific Gravity:	1.250 (type)
Solution Appearance	Micro water white
pH (5% dilution)	10.0 (type)
IP287 Corrosion Break Point (% Vol)	0.5%
